Horse Manure Management Services

1. This addendum is being issued to answer questions from potential offerors and to extend the bid due date. See attached vendor questions and Virginia Tech responses.

2. All other terms, conditions and descriptions remain the same.

3. The due date and hour is changed from October 10, 2019 at 3PM TO October 14, 2019 AT 3pm

I acknowledge that I have read and understand this addendum in its entirety.

Signature   Date

Revised 01/01/2018
1. **Vendor Question: How flexible is the start date for removal of the manure?**
   *Virginia Tech Response: Although this is negotiable, Virginia Tech would like awarded vendor to begin work within 30 days of notice of award of contract.*

2. **Vendor Question: Will there be any non-organic debris in the manure such as twine, needs, syringes trash etc?**
   *Virginia Tech Response: Although personnel try to keep debris out of the stalls where the waste originates, it is impossible to keep out all debris. Needles and syringes get disposed of in the facilities regulated medical waste stream. However, Virginia Tech cannot guarantee none of these items are ever dropped in a stall and end up in the pile. Additionally, Virginia Tech is not responsible for composition of the manure itself.*

3. **Vendor Question: After the current 15,000 cubic yards of material are removed, will the Equine Medical Center be responsible for piling new material so the contract vendor can just come in and load it?**
   *Virginia Tech Response: That is correct. The Equine Medical Center will pile the material for the contractor to load.*

4. **Vendor Question: Please confirm that the lump sum fee will be regardless of whether there is more or less manure in the pile?**
   *Virginia Tech Response: In addition to this question, we also received a question about the possibility of providing pricing for yearly removal as well as monthly removal of manure. For that reason, the following price schedule has been provided which should provide for easier price comparison:*

   **PRICE SCHEDULE: TO BE COMPLETED BY OFFEREOR:**

   Note: Prices shall include all labor materials, loaders, trucks and equipment to do the work

   a) Provide a lump sum price for the removal of the initial, approximately 15,000 cubic yards of manure on the premises now:

   
   $________________

   b) Provide PER CUBIC YARD price for the MONTHLY removal of approximately 357 cubic yards of manure:

   
   $________________ per cubic yard

   c) Provide a PER CUBIC YARD price for once yearly removal of manure.

   
   $________________ per cubic yard
